Citation of Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art cited serves to further establish the state of the art. The references considered, taken alone or in combination, fails to disclose or suggest the present claimed subject matter.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Applicant has responded to each of the rejections in the amendments and remarks filed 2003 May 5.

With respect to the Etzrodt reference, it is agreed that this reference is not prior art to the present application since Applicant is entitled to the properly claimed benefit of earlier filing date of foreign patent application which claim has been perfected by receipt in the USPTO of certified copy of said foreign patent application.

With respect to the Nakano reference, the disclosure appears to lack sufficient specificity to support an anticipation rejection of the presently claimed aluminum compounds, and furthermore, the presently drafted claims require a glycol ether which the reference does not disclose or suggest.

With respect to the Takashina reference, Applicant's contention that the disclosed reaction conditions would fail to produce the presently claimed aluminum compounds appears to be correct, accordingly the reference does not constitute an anticipating disclosure nor suggesting of obviousness.

Art Unit: 1714

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
